

I understand that K-LOVE radio is in danger of being forced off the air because of an FCC decision to introduced Low Power FM. We have been listening to K-LOVE for several years and it has been such a refreshing presence. It stays on most of the time in our house. K-LOVE is one of the few stations, national or otherwise, the exudes positive, uplifting music. I cannot imagine it being taken from us. Please do not force it off the air by restricting FM translators. It serves our area well.
